

Stopping Xanthomonas And Other Plant Spotters

Margery Daughtrey
Cornell University
Long Island Hort Research &
Extension Center

Xanthomonas

Xanthomonas (pathogen) names:

Xanthomonas pelargonii

Xanthomonas campestris pv. *pelargonii*

(Xcp)

Xanthomonas hortorum pv. *pelargonii*

(Xhp)

Bacterial blight disease of
geraniums

Pelargonium X hortorum

Geranium sanguineum

Spring 2022

Wilt + yellowing

Tiny spots

SEB1, Sample extract powder

Contains SEB1.

Store at +4°C.

FOR IN VITRO USE ONLY

Agdia

Xhp 00033

Cultural Controls for Xanthomonas

- Culture-indexed cuttings or hybrid seed
- Sanitation
- Scouting
- Minimize splashing
- NO ivies over zonals
- Keep hybrid seedlings separate from vegetative
- Keep sources separate
- Avoid ebb/flood irrigation or capillary mats

Horizontal spread:
Patriot cultivar with
Bacterial blight

Whole genome sequencing-based tracing of a 2022 introduction and outbreak of *Xanthomonas hortorum* pv. *pelargonii*.

Phytopathology, 14 Dec 2022,

DOI: [10.1094/phyto-09-22-0321-r](https://doi.org/10.1094/phyto-09-22-0321-r) PMID: 36515656

27 strains from 2022 – 18 from one company, others proved horizontal spread common

Ralstonia

Agent of
Southern Bacterial Wilt

Wilting But No Spots – *Ralstonia solanacearum*

Kathleen Holman

Species complex

Ralstonia solanacearum – endemic

Ralstonia solanaceraum Race 3 Biovar 2
– Select Agent

Both cause Southern wilt of geranium

Ralstonia R3Bv2 Symptoms

Courtesy of MSU
Plant and Pest
Diagnostic Lab

Symptoms on Geraniums

- **Yellowing, wilting and browning of lower leaves**
- **Vascular discoloration and necrosis of the stem**
- **Brown discoloration of the roots**

Photos Margery Daughtrey, Cornell University, www.pdis.org

Signs on Geraniums

- **Bacterial Ooze**
- **Bacterial streaming:** cut stem or petiole placed in water should display cloud generated from bacterial streaming out of plant tissue

Sanitation is Critical at All Stages of Production Against Xanthomonas and Ralstonia on Geraniums

Other Common Hosts of Bacterial Diseases Caused by
Xanthomonads:

Cabbage, Kale

Zinnia

Begonia

Hot Water Treatment Of Seed

Bacterium is **seed-borne**

Xanthomonas leaf spot of zinnia

Bacterium is seed-borne

Xanthomonas axonopodis pv. *begoniae*

Acidovorax

Vorax

Image from Wikipedia

Didelphodon vorax

A. avenae subsp. *avenae*
Also petunia, *Strelitzia*

Acidovorax
on canna

Bacterial stripe disease

Pseudomonas

A bacterial leafspot
on hibiscus

*Pseudomonas
amygdali*
on hibiscus

A close-up photograph of a Mum plant's leaves. The leaves are green with distinct serrated edges. Several leaves show dark, irregular spots, which are characteristic of bacterial leaf spot. Some of these spots have turned black and are surrounded by a yellowish halo. The overall texture of the leaves appears slightly wrinkled or distorted in some areas.

cichorii*

*Pseudomonas
cichorii*

TREATMENT OPTIONS for BACTERIA

Copper sulfate pentahydrate - Phyton 35 (48 hr REI)

Copper salts of fatty & rosin acids – Camelot O

Copper hydroxide – Champ, Kalmor, CuPRO 5000, Nu-Cop . . .

Copper + mancozebs - Junction, etc.

Streptomycin - Agri-Mycin (but bleaches geraniums)

***Bacillus* – Cease, Companion, Triathlon BA, Stargus**

Phosphorous acid materials - K-Phite, Areca, etc.

Powdery Mildews

Most damaging when they fool you

Powdery Mildew

It comes back!

PM

calibrachoa

Powdery Mildew on
Calibrachoa

Powdery Mildew on
Calibrachoa

But sometimes
PM can fool you!

Powdery Mildew on Rex Begonia

Cultural control of PM

Avoid highly susceptible cultivars

Keep humidity down

Circulate the air

Fungicide FRAC Groups for PM Management

(some examples):

GROUP 11: strobilurins

GROUP 3: DMIs

Also 11 + 7 ...

GROUP 5

GROUP 19

Also 9 + 12

GROUP NC

GROUP 44

GROUP BM01, BM02

Fungicide FRAC Groups for PM Management (some examples):

GP 11: strobilurins

e.g. **Compass, Pageant Intrinsic**

GP 3: DMIs

e.g. **Terraguard, Hoist/Eagle, Avelyo**
(& BannerMAXX, Tourney outside)

Also 11 + 7 ...

Combo for PM Management (+ leaf spots)

GP 11 + 7 (strobilurin + SDHI):

Orkestra (pyraclostrobin + fluxapyroxad) G,N,RN,L

**Broadform (trifloxystrobin and fluopyram) G,N,L
(neither for LI use)**

Mural (azoxystrobin + benzovindiflupyr) G,N,L

Fungicides for PM Management (cont'd)

GP 5: piperalin – Pipron [G only]

GP 19: polyoxin D – Affirm [G, hoop house etc]

GP 9 + 12: Palladium (cyprodinil + fludioxonil) [production]

GP NC: Milstop, Hort oil, Neem oil, Regalia GNF

GP 44 or BM 02: Cease, Companion, Triathlon BA (*Bacillus subtilis* and *B. amlyoliquefaciens*) GN(some L)

BM 02: Actinovate (*Streptomyces griseoviridis*) GNL

BM-01: Regime (BLAD, from lupines)

Leaf Spots

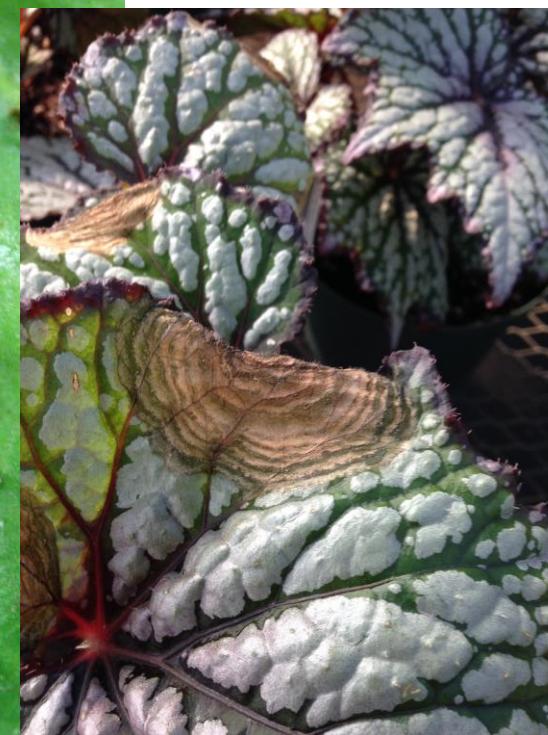

Stemphylium
On Kalanchoe

Cercospora Leaf Spot

Botrytis

begonia

Zonate lesions

Leaf Spot Fungicides
Chlorothalonil (M05)
DMIs (Group 3)
Strobilurins (Group 11)
Group 11 + 7s (above + SDHIs)

Rusts

As with leaf spots, avoid leaf wetness

Monstera with
yellow flecks on
leaves

Very happy in
my office . . .

Manage leaf wetness
early in growing season

Rust on Knockout Roses

Jerry Giordano images

Downy Mildew (Spots & Systemic)

2023: coleus, bracteantha, basil and highly resistant impatiens

Coleus DM may cause leaf spots

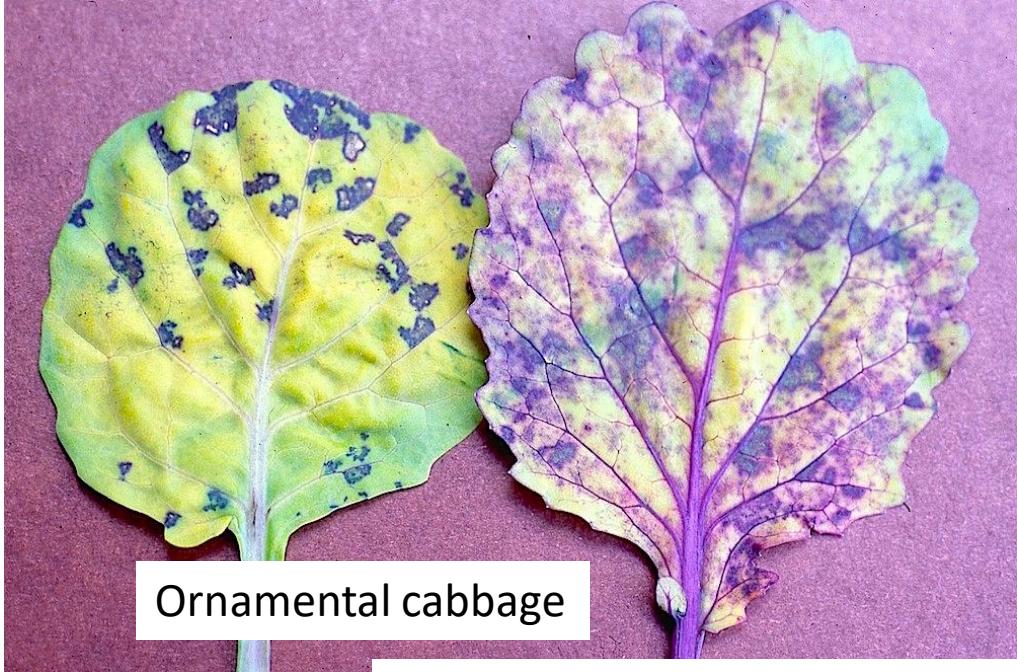

IRREGULAR or
VEIN-BOUNDED

No infection at 86F
Some infection (<10%) at 77F
Plenty of infection at 68F
Lots of infection at 59F
(MSU-Harlan & Hausbeck data)

Downy Mildew on Foxglove

Ornamental cabbage

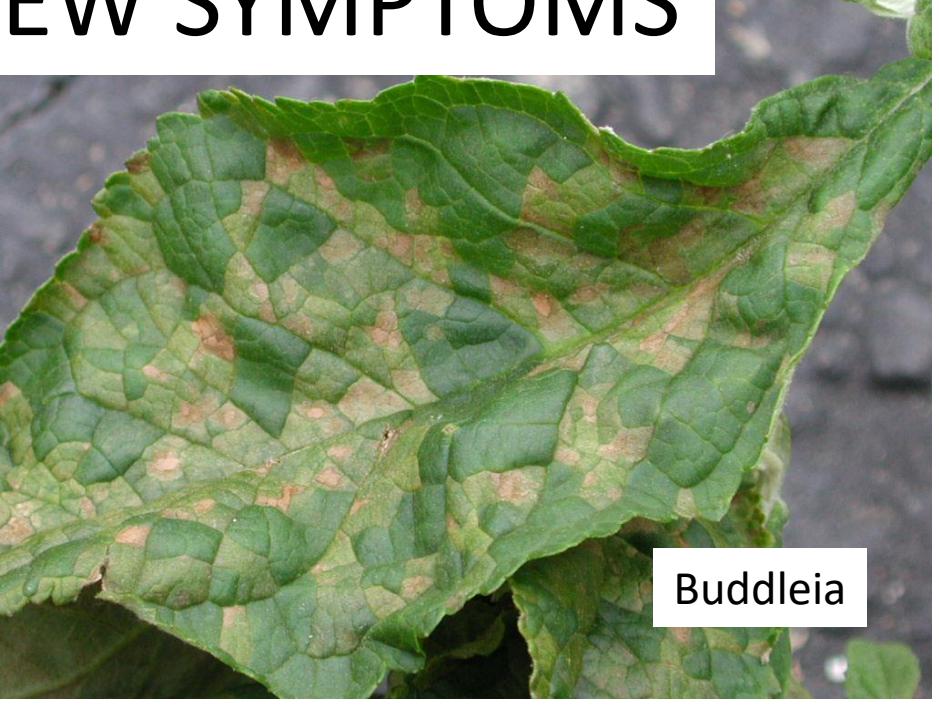

cleome

DOWNY MILDEW SYMPTOMS

Hardy geranium

Buddleia

osteospermum

New England
Aster

Helichrysum

Downy
Mildew
Symptoms
&
Signs

Snapdragon Downy Mildew

Yellowing of the new growth may signal systemic DM

Plasmopara halstedii
Sunflower downy mildew

Amazel with DM

Managing Basil Downy Mildew

**K-Phite, FosPhite, Rampart
(Phos acids) - FRAC 33
(can use at low rate with others, or
use alone at high rate)**

Revus (mandipropamid) - FRAC 40

Ranman (cyazofamid) - FRAC 21

**Heritage, Micora, Segovis, SubdueMAXX
Gp 11 40 49 4**

Localized Infections caused by a downy mildew

Vein-bounded leaf spots

Rose Downy Mildew

Favored by
59-68°F
85-100% RH

Over 80°F for 24 hrs kills all spores

DM Trial Results on Roses

Baysal-Gurel & Simmons PDMR 11:OT011 and 012

Sprays of Subdue + Micora, alt Mural, alt Segovis worked well at 7-14 day intervals

Best effectiveness at Chase Research Gardens:

Segway, Stature DM, Micora, Aliette, Subdue-MUST TANK MIX)

MSU

Heritage, Stature, Junction, Daconil (but beware on Knockouts)

Downy mildew sporulation on undersurface of leaves – white to gray

impatiens

coleus

COLEUS DM

Long Island NY:

- Orvego 11-28 fl oz/100
- Pageant 8 fl oz/100
- Stature 6.4 oz/100 (better to use 12.8 oz)

While Heritage and Aliette NOT very effective

Michigan:

- FenStop, Orvego, Stature (SP)
- Subdue (DR)
